

i use a 1010 code to dial long distance. last month bill i was billed by another long distance company for the call i made using 1010 code. I was charged at a higher rate than what the 1010 company charges me. I was told that this could happen if the 1010 company is resaling another companies airtime and the 1010 company's network is busy the supplier of the airtime will route the call at rates higher because you are not a subscriber to the company suppling airtime. Can you please tell me if this is true. thank you
